

MULTICLIENT RESEARCH CATALOG

EACH MULTICLIENT STUDY INCLUDES:

We are a strategy
consultancy *first*.

- ✓ Comprehensive PowerPoint report with detailed analysis, charts, and expert commentary
- ✓ Free sponsor webinars and presentations for internal teams
- ✓ Proprietary sponsor-only questions integrated into surveys
- ✓ Continued support from Foodservice IP (FSIP) beyond delivery (no added fees)
- ✓ Strategic integration: FSIP partners with sponsors to translate findings into practical growth roadmaps
- ✓ Robust appendix with survey instruments and full data set

PROPOSED FSIP 2027 RESEARCH PORTFOLIO

Convenience Store Foodservice: Winning the Next Meal Occasion

Convenience stores are expanding beyond traditional snacks and beverages to compete for breakfast, lunch, dinner, and between-meal occasions. This study examines prepared foods, grab-and-go, made-to-order offerings, beverages, bundled meals, and the operational capabilities required for stronger execution. Operator and consumer research will identify what drives trial, trust, repeat purchases, and increased foodservice frequency.

Winning Operator Acceptance in a Tough Environment

Foodservice operators are under growing pressure to limit risk when considering new products, programs, and growth ideas. This study examines the barriers that prevent opportunities from moving from initial interest to authorization, trial, rollout, and repeat purchase. The research will identify how manufacturers can reduce operator risk, address cross-functional barriers, strengthen route-to-market execution, and provide the evidence and support needed to improve acceptance and accelerate adoption.

AI in Foodservice: From Experimentation to Competitive Advantage

Artificial intelligence is moving from experimentation into everyday foodservice decision-making. This study examines where AI is creating measurable value across purchasing, menu development, forecasting, labor management, marketing, customer insights, and business planning. It will also identify adoption barriers, organizational concerns, and opportunities for manufacturers to use AI to strengthen innovation, sales, customer support, and strategic decision-making.

Protein Across the Foodservice Menu

Protein has moved beyond the center of the plate into breakfast, beverages, snacks, bakery products, handhelds, and foods positioned around health, energy, and satiety. This operator-focused study examines animal proteins, eggs, dairy, plant-based products, and protein-enhanced foods and beverages. It will identify the channels, applications, product formats, and operating requirements offering manufacturers the strongest opportunities for growth.

Breakfast and the Expanding Morning Occasion

Breakfast is evolving across restaurants, convenience stores, colleges and universities, K-12 schools, lodging, healthcare, and workplace foodservice. This operator-focused study examines breakfast foods, handhelds, bakery, proteins, coffee, specialty beverages, portability, all-day availability, and labor-saving formats. The research will identify changing operator priorities, unmet product needs, and opportunities spanning both food and beverage categories

Flexibility in Study Topics

At FSIP, we recognize that the most valuable insights often emerge directly from our sponsors' priorities. If there is sufficient interest in a specific topic, we are flexible in adjusting the research calendar. Typically, it takes three to four sponsors to initiate a new study. This ensures the project is both cost-effective and highly relevant to the participants. We encourage sponsors to share areas of interest, and we will consider launching additional studies based on demand.

Pricing & Timing

- One study: \$15,000
- Two studies: \$26,500
- Three studies: \$35,000

Kickoffs: Pre-work 4Q 2026, Fielding Q1 2027 (report delivery end of Q1, start of Q2)

Recently Completed & Available for Immediate Purchase

- The Next Generation of Chefs: Millennials & Gen Z as Decision-Makers
- Growth Drivers in K-12 Foodservice
- Senior Living Foodservice: Hospitality Meets Healthcare
- Foodservice Beverages: Coffee, Tea, Energy & Functional
- Digital Distributor Platforms: Reshaping Operator-Distributor Relationships
- Selling to Central Kitchens & Commissaries
- Bundle pricing applies when combining past and upcoming reports.

Closing Note

Our multi-client studies represent one dimension of FSIP's work. They provide affordable access to timely evidence, but our primary work is guiding clients through custom strategy development, go-to-market planning, and execution support. These projects serve as catalysts for deeper engagements, where the evidence gathered here becomes the foundation for tailored growth strategies.
